EDUCATION

Clark Atlanta University – *Bachelor of Science in Computer Science*

Atlanta, GA

GPA: 3.6/4.0 | Completed May 2026

Relevant Coursework: Data Structures, Computer Algorithms, Operating Systems, Database Systems, Software Engineering, Cybersecurity I, Computer Forensics, Linear Algebra, Rich Internet Applications

SKILLS

Languages: Python, SQL, JavaScript, Java, PHP, HTML, CSS, R, Octave.

Frameworks & Tools: React, Node.js, Express, MongoDB (MERN + Full Stack), Supabase, Docker, Apache Kafka, Git/GitHub.

Developer Platforms: Amazon Web Services (AWS), Google Cloud Platform (GCP), Google Colab.

Forensics Architecture: FTK Imager, Autopsy, Sleuthkit, Pyshark, Registry Viewer, Hiren, Kali Linux, DB Browser for SQLite.

RELEVANT EXPERIENCE

CodePath – *Tech Fellow (Teacher's Assistant)*

Sept 2025 – Dec 2025

- Mentored and facilitated technical lab sessions for 30+ students, increasing code comprehension and unblocking critical development bugs during challenging programming tasks.
- Collaborated with an adjunct instructor and the core engineering team to track individual student metrics, escalating technical blockers and minimizing student drop-out rates.
- Completed 10+ hours of rigorous pre-program curriculum training to effectively lead deep dives into advanced algorithms and software engineering principles.

AI 4 Black Kids Summer Discovery Camp (AI4BK) – *Coach / Counselor*

June 2024 – July 2024

- Co-developed and delivered interactive AI-based Python lesson plans for 20+ middle and high school students, accelerating foundational knowledge in machine learning.
- Guided student development teams on predictive projects, engineering a foundational machine learning model designed to accurately analyze and predict localized crime trends.
- Translated complex technical AI models and mathematical formulas into clear, accessible documentation for diverse technical and non-technical stakeholders.

PROJECTS

Securo / Capstone Web Application – *React, Node.js, Express, MongoDB, Docker, GCP Cloud Run*

capston-project-ash34313

- Engineered a secure full-stack web store utilizing the MERN stack architecture integrated with a robust cryptographic token authentication matrix to safeguard user traffic.
- Streamlined production deployment by containerizing the application lifecycle with Docker and implementing automated GitHub Actions CI/CD to Google Cloud Run.

Rich Internet Application Portals (v1 & v2) – *JavaScript, HTML5, CSS3, REST APIs, PHP, SQL*

RIAwebapp1 & RIAwebapp2

- Developed interactive multi-tier web applications featuring dynamic front-end state management and asynchronous data fetching to enhance client-side UI responsiveness.
- Optimized back-end data consistency by implementing relational schemas and data access structures using PHP and SQL databases to safely store user information.

Autonomous Cyber Defense Project – *Java, Apache Kafka (Data Collector Engineer)*

CyberCyte

- Implemented a distributed consensus simulator utilizing the Raft algorithm to maintain transactional consistency across multi-node environments.
- Configured real-time data pipelines through message brokers, resolving synchronization bottlenecks across complex distributed message states.
- Accelerated log aggregation speeds by organizing structural network data inputs, improving downstream analysis for active anomaly detection models.

OTHER EXPERIENCE & INVOLVEMENT

Citi Trends – Store Sales Associate

June 2025 – Aug 2025

- Streamlined logistics operations by managing high-volume weekly freight intake, cutting processing times to transition high-demand merchandise to the sales floor faster.
- Managed register cash flow and point-of-sale transactions with 100% precision while actively deploying strategic loss-prevention techniques to reduce store shrinkage.

Troopons (formerly Coups for Troops) – Volunteer / Member

May 2015 – March 2020

- Managed the high-volume sorting, organizing, and shipping pipelines of thousands of international items to active military installations overseas.

HONORS & SCHOOL INVOLVEMENT

- **Dean's List Award Recipient**, Clark Atlanta University (4 Semesters) | August 2023 – May 2026
